**International research collaboration:**

In 2014 I established a collaboration with the Institute of Liver Studies at King's College Hospital, London, United Kingdom, in particular with Professors Giorgina Mieli-Vergani and Diego Vergani, MowatLabs, world authorities in the field of autoimmune liver disease. This collaboration, which has been steadily growing over the years, has proven particularly fruitful, giving me the opportunity to initiate and see to completion research projects, create international links and apply successfully for the establishment of Swiss Autoimmune Liver Disease Registries. The rising interest in liver autoimmunity in our Country has enabled me to organize highly successful international and national scientific meetings. For two of these meetings, owing to their cutting-edge scientific level, I have been invited to collect and publish the meeting contents as guest editor of a prestigious Journal (Journal of Autoimmunity). I received an official affiliation at the Institute of Liver Studies, MowatLabs, King's College Hospital, London, UK in May 2019 by Professor Anil Dhawan. In 2023, I was elected as a member of the steering committee of the International AIH Group ([www.iaihg.org](http://www.iaihg.org)), which is a scientific organization providing a platform for carrying out project-based collaborations on AIH and AIH-related diseases. The IAIHG group has issued the AIH diagnostic scoring systems, and continues to publish reference papers in the field.
